DETAILED ACTION

Claims 20, 21, 24, 25, 28-30 and 55-59 are pending in the instant application.

Response to Final Action

Applicant's response filed on 26 June 2006 is acknowledged. The rejections and objections made in the previous office action are withdrawn.

Reasons for Allowance

The present invention is directed to photocleavable compounds having the general formula:

, depicted in claim 20, wherein R is an aliphatic hydrocarbon chain; wherein the portion defined by -HN-CHR-CO- comprises one or more stable isotopes; and PRG is a protein reactive group that reacts with functional groups on proteins. These compounds are photocleavable and are used for studying receptors and delivery of gene-transfer agents.

The closest prior art of record is US Pat. No. 5,219,764 (Huber et al.), which teaches a similar photocleavable compound, except that in the instant application has a different NHS ester fragment from the prior art.
